The most evidence a seed-permutation test can report, at any effect size
most significance expressible (σ)
training seeds per arm, n
Monte Carlo cap, 4M (this paper): 5.16σ
Monte Carlo cap, 100k permutations: 4.42σ
5σ
n = 1: 10 of 10 surveyed SAE-methods papers (0σ)
n = 6: 3.07σ
n = 13: this paper
